

Ramesh Sundaresan is Vice President of IT and Divisional CIO at Ryder System, Inc.

He is responsible for implementing key strategic and transformational projects for Ryder's Fleet Management Solution (FMS) division, with business operations in more than 800 locations across 49 states, Canada, Puerto Rico, and the U.K. Mr. Sundaresan - along with his team, which has grown under his leadership from 50 to almost 200 resources, all contributing in diverse technologies - is also responsible for enhancing and maintaining operational systems for Ryder's Finance, Marketing, and Human Resource departments.

Mr. Sundaresan holds a Masters in Engineering from Anna University and is a native of Coimbatore, India. He first joined Ryder as an IT Programmer and, over the course of 15 years, has built a successful career by developing strong partnerships to drive growth and deliver IT solutions to support the Ryder business needs.

In 2005, as a Senior IT Manager, Mr. Sundaresan demonstrated his steady hand in leadership as he managed the team responsible for maintaining Ryder's Rental Application and Billing Systems used by Ryder FMS customers. As Director and, subsequently, Group Director of FMS IT, Mr. Sundaresan responsibilities expanded to provide overall strategic direction and leadership for the IT organization servicing Ryder's entire FMS division.
